SUMMARY

A 5th-semester Computer Science (Software Engineering) student at Bina Nusantara University focusing on Web Development and Software Design. Experienced in building end-to-end web applications covering UI/UX prototyping, frontend development, backend logic, API integration, and database management. Active as Secretary of HIMTI BINUS at Bekasi, I leverage strong organizational leadership and cross functional teamwork to deliver high impact.

EDUCATION

Bina Nusantara University | GPA: 3.14 / 4.00 **Sept 2024 - Present**
Bachelor of Computer Science - Software Engineering

PROJECT EXPERIENCE

Card Guard – Credit Card Fraud Detection App
FastAPI, Python, PostgreSQL, Docker, Railway

- Developed secure backend REST APIs using FastAPI for user authentication (Login, Register, Profile) and documented endpoints using Swagger UI.
- Configured and managed a PostgreSQL database running inside a Docker container to store and process user and transaction data.
- Integrated backend services with both the Machine Learning predictive model and Frontend, deploying the production-ready service to Railway.

Clash of BaNG – Gaming Community Website
HTML, CSS, JavaScript, Figma

- Designed the UI/UX prototype in Figma for a gaming community platform.
- Translated the design into a fully functional and responsive frontend website using HTML, CSS, and JavaScript, ensuring cross-device compatibility.

SWARNA – Phygital Gateway & Web3 Royalty Ecosystem
Figma, UI/UX Design, Web3, NFC Technology

- Designed a high-fidelity mobile UI/UX prototype in Figma for the GEMASTIK UX Design Competition, connecting physical artwork with Web3 smart contracts.
- Applied Human-Centered Design (HCD) methodologies to construct user flows for physical artwork scanning, digital certificate verification, and secondary market royalty management.

FuelMate – Interactive Fuel Management & Station Finder App
Figma, System Analysis, ERD, UML

- Performed system analysis and designed the application architecture, creating ERD database schemas (Crow's Foot notation), Use Case diagrams, and system flowcharts.
- Designed an interactive high-fidelity mobile prototype in Figma to optimize fuel tracking and station discovery for drivers.
- Conceptualized logic flows for route-based gas station notifications, fuel efficiency algorithms, and real-time refueling cost estimations.

EXPERIENCE

Secretary of HIMTI BINUS Bekasi **Feb 2026 – Present**
HIMTI BINUS University
- Managed official administrative documentations, proposal filings, and formal correspondence for all regional organizational events.
- Monitored work program executions across regional divisions.
- Coordinated internal administrative workflows with event committees.

Google Student Ambassador **October 2026 – Present**
Google Student Ambassador Indonesia
- Representing Google on campus to empower students through technical initiatives, AI workshops, and developer programs.
- Organizing campus community events and technical sessions to build digital skills and promote Google technology ecosystems.

Master of Ceremony – TECHFEST 2025 **July 2025**
HIMTI BINUS University
- Hosted and led event proceedings as Master of Ceremony, maintaining audience engagement and smooth stage transitions.
- Collaborated with event coordinators to keep the agenda on track.

Staff of Track 1 – Codeavour International 7.0 **May 2026**
HIMTI BINUS University
- Executed Track 1 exhibition operations for Codeavour 2026, overseeing project showcases and ensuring a seamless experience for global participants and attendees.
- Served as a key liaison between student competitors and the core Codeavour organizing team to streamline communications, resolve operational inquiries, and manage schedules.

Volunteer – Web Development Instructor **September 2026**
BINUS University
- Mentored 10th-grade high school students in fundamental web development, covering Semantic HTML structures (header, main, footer) and foundational CSS concepts.
- Conducted interactive, hands-on teaching sessions to guide students in practical coding and foster algorithmic thinking.

Volunteer – Computer Tutoring Program From BINUS University **February 2025**
SSO BINUS Bekasi x TFISC, HIMTI, HIMSISFO
- Educated primary and junior high school students on computer fundamentals, graphic tools (Paint), and office software (Microsoft Word).
- Introduced algorithmic thinking using interactive block based logic and puzzle games.
- Designed interactive and engaging learning methods to boost digital literacy, creativity, and student confidence

TECHNICAL SKILLS

Programming Languages: Python, Java, C, HTML5, CSS3, JavaScript.
Developer Tools: VS Code, Eclipse, Google Collab, GitHub, Docker, PostgreSQL, MySQL, FastAPI.
Software & Design Tools: Figma, Canva.
Concepts: Object-Oriented Programming (OOP), RESTful API, Data Analytics & Machine Learning Modeling, Database Management, Software Architecture Patterns (Factory & Decorator), Human-Centered Design (HCD), Design Thinking.
Soft Skills: Technical Problem-Solving, Team Collaboration, Project Management, Public Speaking / Communication, Event Coordination.
